

ADVANCED AUDIOLOGY SEMINARS
@ Royal Surrey County Hospital

HOW TO... SEMINARS

The idea is to have a series of How to..... topics such as

- How to deal with patients with Hyperacusis?
- How to record and interpret Auditory Brainstem Potentials in newborns and adults?
- How to assess a dizzy patient?
- How to interpret REMS and RECD measurements?
- How to assess a patient with dementia for hearing loss?
- How to deliver patient- specific balance rehabilitation?

Discussion Topics may include.....

- Does aetiology of hearing loss matter in management of that loss?
- Is there real benefit in testing for dead regions?
- What can be done for Tinnitus patients?
- What is the role of the audiologist in autism spectrum disorders?

Please suggest topics that you would like covered.
