Royal Surrey County Hospital (RSCH) NHS Foundation Trust fully subscribes to the National Patient Safety Agency (NPSA) Being Open best practice framework, November 2010.

**PALS and Advocacy contact details**

Contact details of independent advocacy services can be provided by our Patient Advice and Liaison Service (PALS) who are located in far left corner as you enter the main reception area. PALS are also your first point of contact for health related issues, questions or concerns surrounding RSCH patient services.

**Telephone:** 01483 402757  
**Email:** rsc-tr.pals@nhs.net  
**Opening hours:** 9.00am–4.00pm Monday to Friday

If you would like information documents in large print, on tape or in another language or form please contact PALS.

What are the possible side-effects of the procedure?

After the procedure you may notice some or all of the following changes

- blood from your back passage, usually when opening your bowels
- blood present in your urine
- blood staining of the semen after ejaculation

These changes can persist for up to two weeks and are nothing to worry about. If they continue after that please contact your doctor.

However, if you develop any of the following problems you should contact your doctor or the hospital immediately –

- a fever and generally feeling unwell
- shivering or flu-like muscle and joint aches

Please do not hesitate to contact the Urology Specialist Radiographer if you have any questions about this procedure.
